SHARP BREAK RECORDED IN THE GRAIN MARKETS.

ALL STARTED OFF STRONG. BUT WEAKENED.

Corn Lost Most, Declining a Point -Wheat Lost Less, and Oats Were Well Sustained.

The bulls in grain yesterday were a disgruntled set when the situation closed, all their expectations coming to naught, the bears having the best of the argument during the last half of the session. The start In every way was favorable for the longs, all the markets opening up bullish and sharply higher. This good send-off proved too tempting for the longs, the prices recorded being too high to be resisted, and on free liquidation, due to reports of rain, and there was a break in prices of from 17sc to 3c, corn being the chief loser. The pit on 'change was a pretty lively place during most of the day, and especially early. when the big change in prices took place. The trading throughout the day was heavy and was accompanied by considerable excitement, and the day was a hot one, speculatively, and in a meteorological sense. The greatest decline for the day was in corn, which market closed at a loss of ic, while wheat was only 1/2 to 1/40 lower, and oats, which held up remarkably well, even when other grains were breaking, closed from 1/2 to 1/40 better than on last Satur-

Wheat yesterday was subjected to something of a razzle-dazzle, and during the session traders saw largely higher and largely lower prices, the market starting off in a manner to arouse bullish enthusiasm, and then under a selling pressure, due chiefly to the collapse in corn, breaking sharply, and closing somewhat lower for the day. Pretty closing somewhat lower for the day. Pretty closing somewhat lower for the day. Freely near everything having an influence upon this grain was bullish. There were reports of farmers holding back their wheat, but the arrivals here were over \$70,000 bu. the heaviest for the season so far. Cable advices of all k.ads were bullish, both England and the Continent reporting a drought that was killing the growing grain. There was also a falling off in exports from Russia, and the amount on passage decreased 2,675,000 bu., whereas last year there rad been only \$72,000 bu. decrease. The weather was extremely hot in the Northwest, and damage reports came from that section. Cornwas away higher, and all domestic markets appeared to be of the same idea, while last, but not least, Liverpool was well sustained, in spite of our bad break Saturday, and after opening %d off, reacted ½d. The market here was very excited at the cutset, and so keen was the desire to buy that Sept. opened 1½c higher at 56c, and immediately bulged to 65%c. There was a rush to sell on this advance, and the pressure continued until the above option touched 65c, then rallied to 65%c bid, only to break on predictions of rain to as low as 64%c. In the meantime Dec., which was quieter, soid at 55%c. Gown to 68c. A large amount of long wheat came out on the decline, and there was also heavy selling on the part of those who favored the bear side. Sept. Juring this time ranged between 64%c, while Dec. soid at 55%c. Closing cables reported Liverpool %d higher for the day, and London anchanged, but Antwerp was %c lower, and Buin-Pesth %c off. The export clearances of flour and wheat were encouraging at 68,000 bu. The reported decrease of 1.700,000 bu. in the visible, as compared with 78,000 bu. in the v near everything having an influence upon this grain was bullish. There were reports

The local corn market was strong early, it having recovered from its bearish attack of Saturday. The buying was on an enormous scale, every broker and commission-house receiving them in large numbers from the country and also from local speculators. Weather conditions were as bullish as ever, hot, clear weather prevailing in the Southwest, little rain being reported and damage reports coming in with every and damage reports coming in with every all. The initial sales here in Sept. were to to before, at the to to before, but this admee was not held long, as so much corn me out the market gave way and went dokly to the to the total and the total to the total and the total to the total total to the total tota quickly to \$20. This was followed by a rally to \$2\%c, but another break came on reports of rain in Kansas and unsettled weather conditions, together with the report that the damage to the crop had been greatly exaggerated. The selling increased on this let-down, and Sept. went to 50\%c, and as the selling by longs and on stop-loss orders was beavy, that option went to 50\%c, and as the selling by longs and on stop-loss orders was beavy, that option went to 50\%c, but reacted to fic. Liverpool reported a decline for the day of \%d; the clearances were only \$4000 bu., but receipts were light. Most of the advices late were to the effect that good rains had fallen in Kansas, and were predicted for Missouri, which checked all disposition to buy. The visible of this country showed a decrease of \$65,000 bu., and the amount affeat increased \$256,000 bu. whereas last year there was an increase of \$250,000 bu. in the former and 1,328,000 bu. in the latter. At the close July was nominally \$00, Sept. selling and closing at \$60\%c.

nally 50c, Sept. selling and closing at 50½c.

There was a much stronger undertone to oats yesterday than either wheat or corn showed, but the situation was comparatively quiet. Crop reports were almost universally bad, receipts small and no selling pressure on. The opening trades in Sept. were at ½c advance, at 32½c, and later 22½c was paid, but the market went back to was paid, but the market went back to as poorly after. The predictions for rains and the break in wheat and corn caused weakness to appear, and Sept. went to and closed at 33½c. May sold at 35½c and closed at that asked. July was nominal at 33c. The visible supply of this country decreased 1,777,000 bu., against 2,000,000 bu, decrease a year ago.

Celery was dull and weak, as offerings were liberal and the demand slow.

String beans were scarce and firm, as offerings were light and gegerally of poor quality. Good stock was wanted.

Green peans were wanted, but the market was bare of good stock.

Other vegetables were quiet and steady.

Apples were in good demand and steady.

Apples were in good demand and steady.

Choice fruit was scarce.

Peaches were dull and easier, as receipts were fairly heavy and the demand was slow. Choice fruit point of the common stock was weak and plentiful. Offerings of home-grown were of poor quality.

Plums were dull and slow. Both receipts and demand light and prices unchanged.

Cherries were dull and slow at unchanged prices. Offerings were light, but the demand was also light.

Pears were scarce and firm.

Blaskborries were dull and slow. Receipts were light, but there was little demand.

Crab apples were dull and slow. Receipts were light, but were in excess of the demand.

Cantaloupes were more plentiful and easier, as most of the receipts were overripe, and the demand was principally for choice melons.

Watermelons were steady and unchanged. Receipts were light and there was a good demand for choice melons. Dinkies and culis, however, were dull and slow.

Oranges were scarce and firm. There was an active demand for choice fruit, and offerings were light.

Lemons were also in good demand and firm, with offerings barely equal to the demand.

Pincapples were quiet and steady at unchanged prices.

Other fruits were steady and unchanged.

Live poultry was dull and weak. Receipts were unusually heavy for Monday, and there was little demand. Shippers were holding out for lower prices and the local trade was light. Hens were dull and nominal.

Dressed poultry was dull and neglected, and prices were dull and nominal.

Dressed poultry was dull and neglected, and prices. Receipts were holding out for lower prices and prices. Receipts were holding out for lower prices, while holders were dull and offerings of good stock met with r | Last wk. VEALS—Choice fat at 42412c. Heretics, rough, small and thin 25334c. Spring lambs 334c.

GAME—Squirrel \$1.25 per doz. for young: 7cc for old. Wheat Lower on Good Liquidation -Oats Declined in Sympathy With Other Grains.

> Chicago, July 15.-Wheat was lower on good liquidation. The market was irregular, with a good trade early. Corn was active and higher at the opening, but closed weaker on good selling by the local professionals.
>
> Oats were well traded in during the early

part of the session, but declined in sympa-thy with the other grains, Provisions were lower and heavy. Wheat.
At the opening wheat was influenced by At the opening wheat was innuenced by reports of extreme heat in the spring-wheat territory, where it was feared it would shrivel the grain and make the yield much smaller than previously hoped. Priess opened strong and %c to 1½c higher than Saturday's close, but there was a break of 2½c, with but a slight recovery, final figure. smaller than previously hoped. Prices opened strong and %c to 1½c higher than Saturday's close, but there was a break of 2½c, with but a slight recovery, final figures showing a loss of ½4½c. Trade was rather brisk around the opening and transactions were of large volume, but later a dull period set in, and after the early rush prices recoded gradually to the low point of the day. The decline was started by free local seiling, which seemed to be liquidation, and there was good selling by professionals, who also bought some.

The predictions of cooler weather for the Northwest, the break in corn and the large primary movement aided the decline. The news from the Northwest was of both kinds, one message saying that the outlook in Southern Minnesota had been decreased about 25 per cent, while another message claimed there was no material change in the situation.

The English visible decreased 524,000 bu., against a decrease ast year of 505,000 bu., against a decrease as year ago of 705,000 bu., against a decrease as year ago of 705,000 bu., against a decrease as year ago of 705,000 bu., against a decrease as showed large decreases, 817,000 bu. Receipts in the Northwest, Minneapolis and Duluth were 474 cars, against 271 last year.

Local receipts were 170 cars, against 180 last year, 11h 375 expected to-morrow. The receipts art Western primary points were 1.376.491 bu., against 384,717 bu. one year ago; shipments were 584,175 bu., against 490,371 last year. The cash business was not very large, and the local shipping inquiry was only moderate, with sales of 73,000 bu. reported. Clearances at the seaboard were large-796,000 bu.—and on the coast 25 boat loads were accepted for export. Liverpool cables this morning were steady to ½c lower for cash wheat and ½c higher in futures. London came unchanged to ½c higher, while Antwerp was off ½c. There were no Parls cables on account of holiday there. The spring-wheat trade was quiet and prices were erratic. At the opening there was a rush to buy, and prices varied in shippi

being 6,329,000 bu., against 5,230,000 bu. last year.

The visible supply decreased 405,000 bu., against an increase last year of 439,000 bu. Local public stocks increased 339,000 bu. On the coast 15 beatloads were accepted and 209,000 bu. cleared. Western primary receipts amounted to 719,000 bu., against 787,000 bu. last year; shipments were 301,000 bu., against 849,000 bu. last year.

The receipts here were rather liberal, 459 cars, with 550 cars estimated for to-morrow. The shipping demand was slow and only about 100,000 bu. was worked. Car lots were

the feeling was weaker and prices &c to the lower.

Oats.

The oats market was governed to some extent by the action of corn. At the opening prices were ic to 1%c higher on the continued dry and hot weather in the oats belt. On reports of showers in parts of the West and Central Illinois, however, prices receded, losing the early gain and closing at the bottom, showing a net loss of %c to %c. Trade was not as large to-day as it has been recently, and it seemed to be more scattered. About all the large local traders have liquidated, and the short interest was not large. The cash business was light, the seaboard reported only 65,000 bu. for export and 116,000 bu. cleared.

Local receipts were 104 cars, with 150 cars estimated for to-morrow. The visible supply decreased 1,777,000 bu. and the local stocks decreased 729,000 bu. Oats by sample were in good request and prices were steady, car lots to go to store were steady, and very little was done.

Barley.

There was a rather week speculative feel-

and very little was done.

Barley.

There was a rather weak speculative feeling in the barley market on account of the very favorable crop reports which were received. There was no demand and it was hard to get bids. Very little maiting demand remains, and the demand for mixed barley is not perhaps so much for present use as for holding. Only two cars were received. The visible supply showed a small decrease from last week. Poor to good screenings sold at 35@4ic; skimming 37c; low-grade 40%43c; fair to good 47@50c; common seed 44%45c.

Range of Futures.

to good \$7.50@8.50; contract \$9.50; Oct. \$3@9.25.

Provisions.

There was a fairly good speculative trade in provisions to-day, with the feeling somewhat unsettled. There was evidence of realizing, which broke prices rather sharply all around. Later in the session there was fairly good miscellaneous buying by packers and shorts, which caused a signt recovery in prices, and the market closed ateady. Foreign markets ruled firm, and domestic markets were steady. Receipts of products were fair.

Pork opened somewhat irregular and prices were 22 fec to \$126 lower. A raily of lot to 150

followed, and the market closed steady at nearly outside figures.

Lard was moderately active, but the feeling was unsettled. Offerings were rather free early and prices ruled 12½ to to 17½ clower. At this decline there was fair scattered buying, which caused a raily of 2½,65¢, and the market closed steady. The shipping inquiry was rather limited and offerings were only fair.

Ribs were easier and prices on the whole range ruled 10¢ to 12½c lower, and cloced steady around inside figures.

Lower-Hogs Weak and Lower.

CATTLE-Native Beef Steers-Native cattle receipts all around were liberal for the first day of the week, aggregating in the neighborhood of 160 car loads, and the beef department came in strong for its percentage. With the exception of ten or tweive loads, which classed as good, the quality was plain and in many instances common and only half finished. The best beef steers, which, by the way, lacked considerable of being choice, were about 10c lower, while all others declined fully 15c to 20c. The market was slow and dull throughout.
